## DETAILED ACTION

Claims 1-20 are presented for examination.

### *Election/Restriction*

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-10 drawn to telecommunication program distribution, classified in class 455, subclass 2.01.
- II. Claims 11-17 and 19-20, drawn to Electronic communication device, classified in class 708, subclass 109.
- III. Claim 18, drawn to file structure application processing, classified in class 707, subclass 104.1.

The inventions I, II and III are related as sub-combinations disclosed as usable together in a single combination. The sub-combinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I (telecommunication program distribution) has separate utility such as distributing telecommunication program. Invention II (Electronic communication device) has separate utility such as making determination of connection between Electronic communication device.

Art Unit: 2171

Invention III (file structure application processing) has separate utility such as collection data to represent an order via file application processing.

Because these inventions are distinct and search groups I, II and III are not required to be simultaneous, restriction for examination purposes as indicated is proper.

Examiner has conducted a telephone interview with Applicant's attorney – Mr. Shane Nichols on June 27, 2004. Upon the interview the attorney is not able to make an election of the groups for the instant claims restriction, as such, the restriction of the instant invention is listed above.

Applicant is reminded that the reply to this restriction election to be completed must include an election of the invention to be examined within one month from the mailing date of this office action, even though the requirement be traversed (37 CFR 1.143).
